Brazil, Minas Gerais

Hello everyone,

My name is Matheus, I'm 27 years old, and I live in Uberaba, Minas Gerais, Brazil, with my girlfriend and our lovely and energetic dogs. I graduated in Chemical Engineering Bachelors from UFTM in 2021 and I'm currently pursuing a MSc in Data Science and Analytics at USP (Universidade de São Paulo)-ESALQ, supplemented by relevant courses in the field from Stanford Online, Google and Data Science Academy.

I'm currently working at Turing as a Python Data Scientist, partnering with Google to develop solutions and propose improvements for Google's Gemini LLM.

At the three Years before, I dedicated my career to Data Analysis, Business Intelligence, and Data Science. During this time, I had the opportunity to work at DiDi Chuxing, a global leader in Mobility Technology, known in Brazil as 99. There, I used various tools, including Business Intelligence, Excel, Big Data, SQL, Python, and Pandas as well as creating Supervised and Unsupervised machine learning models to support business strategies and decisions. My commitment resulted in two promotions, recognition for merit, and exceptional performance in 2022, rated as A/S.

I am passionate about what I do and am enthusiastic about using technology and various tools to support colleagues, stakeholders, and the business as a whole. I am excited to learn more about the company and the people behind it. I hope to have the opportunity to contribute my knowledge and dedication soon.

Thank you for your attention and see you soon!
